

Mindframe media alert

Mindframe reminder for safe reporting on Darwin shooting

5 June 2019

Please cascade to all media staff

Mindframe reminds media of the importance of responsible reporting on the recent shooting in Darwin and urges promotion of help-seeking information for distressed viewers.

When reporting on this story *Mindframe* advises the following:

- Avoid use of graphic or distressing images of victims or deceased.
- Refrain from linking the motivations of the perpetrator to mental illness. Research shows that less than 4% of mass shootings have any links to mental illness. Making this link can result in stigma.
- Avoid using language such as 'crazed gunman' and 'psychopath' as this can also contribute to stigma.
- Finally, always include <u>help-seeking</u> information for people who may be vulnerable.

More information about safe reporting can be found on the *Mindframe* website.

Help-seeking information

Adding help-seeking information to stories (online, print and broadcast) can provide somewhere for people who may be adversely impacted by the coverage to find professional support.

Self-care

Reporting suicide and mental ill-health can also impact to the welfare of journalists. To support media professionals Mindframe, in consultation with the DART Centre Asia Pacific, has developed journalism self-care resources for media professionals reporting suicide and mental illness. These resources include self-care tips for journalists as well as and advice for editors and line managers, and can be found here.
